RECORD PROTECTOR®

- Finger hang starting
- Runs slow or slower
- Works like a computer running Windows 95
- You might find your favourite music this week
- Holds an amount of records

RECORD PROTECTOR® is an old space race device for protecting, yet damaging your favourite records. Simply place all your albums, whether or not they all fit, in RECORD PROTECTOR® move the first record forward without setting off the trap and all the other records may face severe damage. When the selector snaps at the record you wish to protect and, or play, try to take it out of the device as fast as you can to avoid losing a hand. If you haven't sought medical attention by now, reset the trap. When you wish to return what's left of the album to the RECORD PROTECTOR® again, use a surviving limb to try faking with this thing again. Repeat until all records and limbs are rendered useless.
